## TRY DARKENING YOUR GRAY HAIR WITHOUT DYES

Shampoo your hair and scalp each morning for about a week with Q-Ban Hair Color Restorer. If your hair is gray, streaked with gray, prematurely gray or faded, brittle, thin or falling, all your hair will then be beautifully darkened and to such a natural, even dark shade no one would suspect that you had applied Q-Ban. Q-Ban is no dye, perfectly harmless, but makes all your hair soft, fluffy, thick, with that lustrous dark shimmer which makes your hair so fascinating. Big bottle sent prepaid or sold by druggists for 50c. Address Q-Ban Laboratories, Memphis, Tenn.-Adv.

Alaskan Reindeer Industry. The reindeer industry in Alaska was started in 1892 by the importation of 171 of these animals from Stberia. Today the combined herds number more than 50,000. They are steadily increasing, despite the fact that 5,000 of the creatures are killed annually for food and their skins.

MITATION IS SINCEREST FLATTERY but like counterfeit money the imitation has not the worth of the original. Insist on "La Creole" Hair Dressingit's the original. Darkens your hair in the natural way, but contains no dye. Price \$1.00 .- Adv.

## Combination of Silk and Crepe

skirt of crepe or chiffon. The com- cut to correspond with this shape. bination is a favorite which achieves new triumphs in this elegant afternoon frock. It has several small pecultarities that give it a flavor entirely out of the ordinary. One of them is evident in the bodice, which looks like a coatee of silk with drop shoulders, and another appears in the fullin which they are set on in two groups. Between these groups, hardly discernible in the picture, there is an added row black lace insertion are set to used for the skirt. the underside of the chiffon, since fashion refuses to countenance a lack of ornament where there is space to carry It.

shaped neck and fastens to one side edges are frayed and the box plaited in double-breasted effect. Its peplum ruching made very full. is a mere plaited frill at the sides and back headed by a narrow beit of the ruffles in making a frock like the one silk which does not extend across the pictured. The corded edges will give front. There are four small prettily the right set to the ruffles, even in a decorated buttons of glass at the soft silk or satin in case one wishes front. The sleeves of chiffon are long to use a material of this kind already full puffs that reach below the elbow on hand. But if new material is to be and they are set into a wide flaring bought it might as well be taffeta; its cuff finished with a ruche. It will be crispness is an advantage

it is ruffied four times about a full over the elbow and that the cuff is

The narrow ruffles are made to stand out from the skirt by the cording at their hems, and they are fulled over a cord also. The frock is simple but original, showing an ingenious handling of the modes It presents many advantages to the woman who may wish to remodel a dress made of ness of the corded ruffles and the way a thin material, as voile, organdie or marquisette. The small coatee of taffets and the taffets ruffler will go well with these and with heavier materials, decoration. Bow-knot uctifs of nar- or the finer lace flouncings may be

CHARLES F. HIGGS A good deal of money has been made in fruit growing A good deal has been lost, too. The losses have been mainly by the men who have been in too great a hurry to garner the profits they have heard successful growers were making.

These get-rich-quick fellows have blindly and eagerly bought raw land. incumbered with stumps and niggerhead bowlders. Forgetting, or possiis necessary in a crowded orchardcrowded by interplanting peaches between apples-they have set their trees without stopping to clear off the stumps and bowlders. The results have been disastrous for them

Some have tried to correct their initial mistake by buying stump-pullers to dispose of the stumps, but lack of space to operate the machines has made this plan ineffective.

Failing in this, some of the more energetic men have tried to cultivate by hand, digging around the trees. Practical fruit growers will appreciate what an endless impractical task this is in a large orchard. Many trees in these hurry-up or

chards have died, and the apples that have been grown on trees that managed to survive have been stunted. knotty and of generally such poor quality that they can be marketed only to vinegar makers. Some of these growers have become discouraged and allowed their orchards to grow weeds, sprouts and briars; in fact, they are practically a total loss. One of these men recently consult-ed me about his orchard. I found it located on a hillside literally covered with pine, white and rock oak, hickory and other stumps as well as mumerous bowlders.

convinced him the trees would never man

amount to anything anyhow, unless he could make it possible to cultivate them with horse-drawn machinery, and he finally decided to take a chance.

Having used dynamite considerably, I agreed to do the blasting for this man. I employed two helpers 'to make the bore holes under the stumps and rocks. For the larger stumps, a soil auger was used: for the smaller ones and the stones, a pointed steel bur and sledge. I followed these men bly not knowing, that good cultivation loading the holes with the charges of dynamite.

> Only one of the young fruit trees was injured by the blasting, because they were small and the dynamite broke the stumps up in small pieces. which did not harm the little trees even if they hit them. The same was true of the niggerheads.

We discovered, while making the holes under the stumps, that in many places there was a layer of hardpan averaging about four inches in thickness, which was so hard we could hardly drive the bar through it, and rain did not seem to penetrate it at all. It lay about eighteen inches below the surface. In blasting the stumps and bowlders, which were thickly scattered through the orchard. we also broke up this hardpan pretty thoroughly.

After seeing this hardpan, the owner decided it was the cause of the poor growth of his trees, so he had me reset them all in blasted holes.

Some time later, when I was in the vicinity, I visited this orchard: found the stump and bowlder fragments all hauled off, the ground nicely cultivated and the trees looking fine and rapidly growing into money.

What I did with this orchard can be done with many another one which I told him to blast out the stumps has been either abandoned or to being and rocks with dynamite. He was continued at a loss because of the afraid it would injure his trees. I very conditions I improved for this

# Health for Sick Women

For Forty Years Lydia E. Pinkham's Vegetable Compound Has Been Woman's Most Reliable Medicine -Here is More Proof.

To women who are suffering from some form of woman's special ills, and have a constant fear of breaking down, the three following letters ought to bring hope:-

North Crandon, Wis. — When I was 16 years old I got married and at 18 years I gave birth to twins and it left me with very poor health. I could not walk across the floor without having to sit down to rest and it was hard for me to keep about and do my work. I went to a doctor and he told me I had a displacement and there, and would have to have an operation. This frightened was a have to have an operation. This frightened me so much that I did not know what to do. Having heard of Lydia E. Pinkham's Vegetable Compound I thought I would give it a trial and it made me as Pinkham remedies."—Mrs. Mayuz Aszaru, North Crandon, Wis.

## Testimony from Oklahoma

Lawton, Okia.—"When I began to take Lydia E Pinkham's Vegetable Compound I seemed to be good for nothing. I tired easily and had headaches much of the time and was irregular. I took it again before my little child was born and it did me a wonderful amount of good at that time. I never fall to recommend Lydia E. Pinkham's Vegetable Compound to alling women because it has done so much for me."—Mrs. A. L. McCaslawn, 509 Have St., Lawton, Okia.

From a Grateful Massachusetts Woman.

Roxbury, Mass.—"I was suffering from inflammation and was examined by a physician who found that my trouble was caused by a displacement. My symptoms were bearing down pains, tackache, and sluggish liver. I tried several kinds of mediand sluggish liver. cine; then I was asked to try Lydia E. Pinkham's Vegetable Compound. It has cured me and I am pleased to be in my usual good health by using it and highly recommend it."—Mrs. R.M. Ossoon, 1 Haynes Park, Roxbury, Mass.
